Notes of the 8th EXARC meeting in Biskupin (Poland), November 12th, 2004

as remembered by Roeland Paardekooper.

See for the list of presence the annex.

- 1. Opening
- 2. Last meeting: tasks which had to be done
- 3. Last Year in Europe: reports by members
- 4. A European Yearbook
- 5. PR of EXARC
- 6. The EU plans of EXARC
- 7. our colleagues: EXAR
- 8. Languages in EXARC
- 9. Next EXARC Meeting
- 10. Last round of remarks

Delphi and Livearch, the EU themes have been or will be discussed separately at the session in Biskupin. Special attention these days is as well paid to the Yearbook EuroREA.

2. Opening

The meeting was opened at 10:25h.

At this meeting, we have four members, who haven't been in our circle before: *Wolfgang Lobisser* and colleague from VIAS in Austria, *a delegation from Pajauta* (Lv), *a delegation from Kernave* (Lv) and *a delegation from SEA* (CZ). From different organisations who were present before, some new faces have joined us at this meeting.

Last meeting, we had 26 organisations as member, totalling 41 people. Now we have 4 organisations and 12 people more (15 nationalities). The total amount of people on our mailing list are 86 people, a number, virtually unchanged.

2. Last meeting: tasks which had to be done

Roeland mentions the tasks, which were executed since last meeting:

- a. The statutes of EXARC have been translated to English and passed around, just like the notes of EXARC's first official meeting as an association (in Lejre);
- b. An EXARC members' pass as well as a sign to be hung near every members' premises' entrance have both been developed and distributed among the members;
- c. The EXARC logo has been made available digitally and forwarded to all members;
- d. The board made a first Year Report of EXARC, on the year 2003;

The only remaining task which had not been executed was the setting up of commissions or workgroups besides of an INTERREG group: *Lars Holten, Bert, Martin, Geir Sør Reime, Björn,* and *Roeland*.

Archeon has made a strong point, stressing the need of such groups, as the work of EXARC is too much to be done with just 2-3 people. Such workgroups are foreseen in the INTERREG proposition. If this project will succeed, EXARC will be turned into a work group based organisation. More information on this in the INTERREG session.

3. Last Year in Europe: reports by members

HOME: (Bert van Valburg) 2003: 48.000, 2004: approx. 53.000

We have 34% higher entrance numbers of tourists. We have as well more support form our local government. We seem to have succeeded in prolonging the existence of the museum.

Unteruhldingen: (Gunter Schöbel) 2003: (i.e. 281.000), 2004: 263.000

Decrease of visitors because of the weather and economical situation. Besides that, we have worked hard on the "Pfahlbauquartett" – 4 cooperating museums, celebrating the 150th anniversary of research to lake dwellings. The second project to mention is "Delphi", a CULTURE 2000 project where Unteruhldingen is the lead partner, next to Archeon (NL) and Araisi (Lv). Inventing new projects for coming years is important.

both because of the heat as because of the growing competition with other tourist attractions. The winter was used for renovation. 2004 is the 150 years' anniversary of lake dwelling research. Fir this different activities are set up in the region. Press and media activities have been intensified. We will hear soon if the EU project "Delphi" (with Archeon and Araisi, 1 year, Culture 2000) will be rewarded and can be pushed through.

<u>Middelaldercentret</u>: (Peter Vemming) 2003: 85.000, 2004: less. We have less visitors, but financially not much harm is done. In 2005, we are planning more events.

<u>Lofotr:</u> (Geir Are Johansen): 2003: 57.500, 2004: 63.000 We had an increase with 20%, but we have less arrangements, companies.

Biskupin: (Wojchiech Piotrowski): 2003: 260.000

Our numbers have remained equal. We celebrated the 70th anniversary of our museum. We are 4 years independent by now and count 50 employees, of which 38 permanent. Our September festival (10th anniversary) was good, with 90.000 visitors. 70% of our income, we earn ourselves, the rest is sponsored and paid by the local government.

Archeon: (Jack Veldman): 2003: 174.000

Our visitor numbers are rather stable this year. Of the 175.000, 45.000 are school groups. In arrangements, we are stable as well, just like the overall turnover. In 2004, the entrance fee was E 14,20. but the costs are rising every year. The shop's turnover is a little more than E 1,00 per visitor.

SEA: (Richard Thér): 2003: 3.000

We are a small project, specialising on school children. Our main project here at this meeting is the yearbook.

Düppel: (Fabian Peise) 2003: 29.000, 2004: 32.000

2004 was a normal year, except for that the museum is already three years in a crisis. The whole thing is about E 25.000, no more. The year 2005 will be dicisive, as we will then reach the bottom of our savings.

<u>Araisi:</u> (Anda Vilka): 2003: 26.322, 2004: 24.000 We had a slight decrease, caused by the weather. Our budget however will increase.

Foteviken: (Björn Jakobsen): 2003: 35.000, 2004: 48.000 or so

The 2nd half of the Summer was very well. We are working, besides on the centre at Foteviken, on a medieval visitor centre "Malmö 1340".

<u>Kalmar/Eketorp</u>: (Arwo Pajusi) Eketorp, 2003: 60.000, 2004: 65.000. Salve Medieval Town: 2003: 25.000, 2004: xx.

<u>VIAS:</u> (Wolfgang Lobisser)

We try in Austria to have in every open air centre archaeologists involved. Right now, we are constructing buildings on various locations in the country.

Kernave (Audrone Jonikiene): 2003: 32.000

We have had a successful year, with a good festival. The high point was UNESCO, adding our site to the World Heritage Sites List. We are developing new programs.

4. A European Yearbook

The Czech colleagues from SEA have presented their plans and product yesterday in a separate session. Their project is called EuroREA. It will be mainly in English, with summaries in 3 other languages.

Bert. our Czech friends have many questions. We all most help them together to have the yearbook truly European. There will be 500 books printed. We with EXARC must distribute these. When you have remarks or suggestions, contact the Czech! We have to fill the book together.

Richard: is the Yearbook important to EXARC? Yes. In that case, when you are interested, you help filling the book and help distributing it.

This is not just a Czech activity, but an EXARC action.

Björn: if the Czech make the book, members will help filling and distributing it. *Peter V.:* is it a specialist book or for the general public? It is more of a specialist book. *Jack*: it is as well a task of the board to foster this action.

5. Our colleagues at EXAR

Different EXARC members have felt the need for EXARC to cooperate with the sister club, EXAR from Oldenburg (D). Again, the situation is explained how these two associations have sprung to life separately, but are form the same tree. The board will try to set up contact with the association from Oldenburg.

6. Next EXARC meeting

Next meeting is proposed to be held in Foteviken at the beginning of March 2005. For our INTERREG proposal it is vital to have all organisations participating in the project to be present!

7. Last round of remarks

Tiny: Archeon has a very prosperous association of "friends". It started with 50 members but now counts 900. This is partly because we set up a lot of activities, but it pays itself back. Besides that, I would like to stress the importance of networking in politics: we need a working group on this within EXARC.

Björn: who else has such a association of friends? All members of EXARC do.

General: thanks to *Roeland* for his secretarial work. Closed at 12:00h

To be taken into future account:

- Setting up commissions or workgroups
- Setting up a new questionnaire for 2004, with hindsight to visitor numbers, financial developments and results, to trends in museum shops, searching possibilities for joint buying et cetera.
